

ASSOCIATION **BROCHURE**

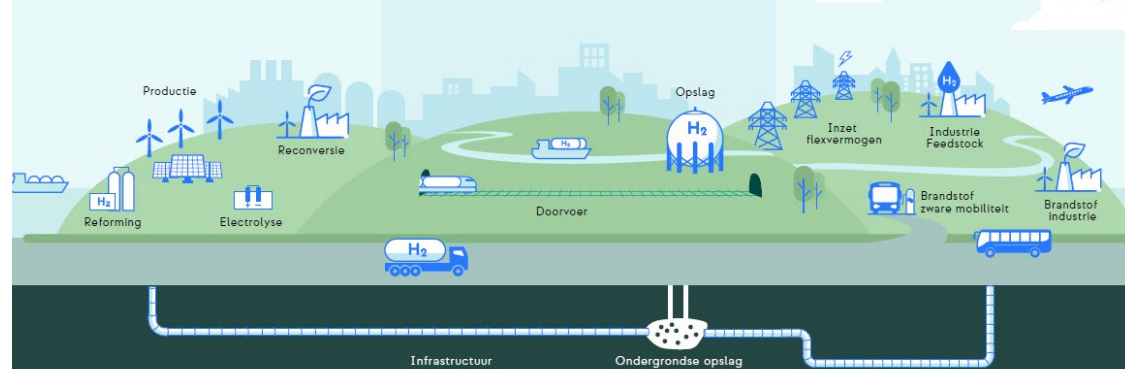

HYDROGEN CONNECTS TODAY TO TOMORROW

About us

NLHydrogen is the industry association that connects, strengthens and represents the Dutch hydrogen sector. Together, we lead the way in achieving security of supply and a climate-neutral society. Through knowledge sharing, a dynamic network and sustainable solutions, we ensure our members remain at the forefront of the energy transition.

NLHydrogen represents the entire hydrogen value chain – from production to end use.

Our members form the core of the primary value chain, ranging from producers and infrastructure operators to industrial end-users, supported by organisations that provide essential products and services.

Together with its members, NLHydrogen develops well-founded, forward-looking positions on key issues within the hydrogen value chain. These are brought together in impactful position papers, and we actively leverage our network to put this agenda on the map with policymakers at local, national and international levels. As a recognised representative of the sector, NLHydrogen is regularly consulted, allowing our insights to directly influence policy and regulation.

Examples of topics on which we develop our positions include:

- Security of supply
- Import of hydrogen (carriers)
- Offshore wind and hydrogen production
- System requirements and optimisation
- Tariff structures and framework conditions
- Industrial obligations and support mechanisms
- Hydrogen and mobility
- Manufacturing industry and services

AS A MEMBER, YOU ACTIVELY SHAPE HYDROGEN POLICY AND REGULATION.

WHY COMPANIES JOIN

1

Influence on policy and regulation

2

Access to a strong network

3

Collaborating on concrete solutions

4

Visibility as frontrunners in a growing market

NLHydrogen offers different types of membership, depending on company size and role in the value chain.

AS A MEMBER OF NLHYDROGEN, YOU ARE PART OF A DYNAMIC AND ACTIVE NETWORK.

Throughout the year, we organise events where knowledge sharing, collaboration and connection take centre stage. From inspiring H2Connect knowledge sessions and informal H2Cafés to meetings and exclusive events such as the annual dinner, there is always an opportunity to get involved and contribute. Click [here](#) to view our annual calendar.

Membership goes beyond attending events. As a member, you are directly involved in the development of the hydrogen sector. You contribute to policy discussions, collaborate with other frontrunners on projects, and actively participate in debates on key hydrogen topics. At the same time, you gain access to up-to-date knowledge, valuable insights and a network of experts across the entire value chain.

GET THE MOST OUT OF YOUR NLHYDROGEN MEMBERSHIP

PRIMARY MEMBERSHIP

For organisations that are directly active in the hydrogen value chain — from production and import to transport and end use. As a primary member, you:

- Have influence on decision-making and policy
- Participate in committees and working groups
- Actively contribute to strategy and position papers
- Collaborate with other frontrunners on the development of the sector

KNOWLEDGE MEMBERSHIP

For organisations that contribute indirectly to the hydrogen sector, such as consultancies, financial institutions and knowledge institutes. As a knowledge member, you:

- Are part of a strong and relevant network
- Participate in events and knowledge sessions
- Share your knowledge and insights with the sector

The membership investment depends on company size and annual turnover.

WORKING TOWARDS A SHARED GOAL

NLHydrogen works with and on behalf of its members to build a mature, open, and future-proof hydrogen value chain. We bring together organizations from across the entire hydrogen ecosystem, facilitate knowledge sharing, and represent the sector in discussions with government and society. For us, hydrogen is not an end in itself, but an important means of reducing CO₂ emissions in areas where other solutions are less suitable.

Together, we are committed to scaling up renewable and low-carbon hydrogen, creating an accessible market, developing appropriate regulations, building reliable infrastructure, and fostering innovation. In doing so, we accelerate the deployment of hydrogen wherever it can make a meaningful and effective contribution to a climate-neutral economy.

Our collaboration is founded on a shared vision for the development of the hydrogen economy and on common objectives for the sector. By becoming a member of NLHydrogen, an organization endorses these principles and actively contributes to achieving this ambition..

WHAT OUR MEMBERS SAY ABOUT US

Quotes from our members' survey

"We have the opportunity to ensure that the position of hydrogen off-takers is also well represented in the effort to establish a hydrogen economy."

"Together, we make a strong case for hydrogen."

"Its scale and visibility make the association an indispensable player in creating an accessible, well-regulated market."

"NLHydrogen brings people together effectively."

"An organisation that cannot be ignored."
